### \*\*\* IMPORTANT \*\*\*Name Server Information

In order to move your domain to our servers you must change your name servers. Changing the name servers listed on your domain is your responsibility as the owner of the domain. You will need to login to your registrar account and change the name servers to the servers listed below:

1. Primary name server hostname: [ns1.twopooches.com](http://ns1.twopooches.com)
2. Secondary name server hostname: [ns2.twopooches.com](http://ns2.twopooches.com)

*Feel Free to Contact Two Pooches if you need help with setting your name servers*

**Email information** (email will not work until your domain name has propagated to our servers) You will need the following information to configure and use the email client of your choice:

**Mail Server:** your domain name(example mail.twopooches.com)

**SMTP Server:** example smtp.charter.net - you should use your ISP's SMTP

**User name:** yourusername (default email)

**Password:** your Password
